

Mariam Afolabi

Data-oriented program analyst and developer who builds reproducible monitoring pipelines, data quality systems, and donor-ready reporting artifacts for Nigerian public-sector and social-impact programs.

EXPERIENCE

Freelance Web & Data Developer

2020 – Present

Singlehandedly developed multiple web and data products: real-time transcription & matching system (scripture-sync), telehealth integrations (NTAL), and several reproducible data analyses for public-sector datasets.

Produced stakeholder-facing briefs and slide decks to communicate findings and recommended actions.

Founder & Community Manager — Campus Collab

Sep 2023 – Present

Launched and scaled a Discord community for Nigerian students in tech, business, arts, and design; implemented onboarding and engagement trackers to monitor participation and learning outcomes.

Built brand guidelines and structured career roadmaps which improved member retention and clarity of learning pathways.

Recruited and coordinated campus ambassadors across multiple institutions to expand program reach.

Web Developer & Digital Content Manager — Creative Arts & Visual Imagery Centre (CAVIC)

Jun 2023 – Nov 2024

Developed and maintained CAVIC's website; improved content discoverability and accessibility.

Collected and analyzed content and traffic data to inform scheduling and promotional activities; produced dashboards and visual summaries for leadership.

Managed exhibition incubation logistics and technical delivery; team selected as top-five finalist in an art+tech exhibition.

SKILLS

- Programming & analysis: Python (Pandas, NumPy), SQL, Jupyter notebooks, basic scikit-learn
- Reporting & visualization: Pandas reporting, Matplotlib, Seaborn, Plotly, Tableau; Markdown → PDF (Pandoc/nbconvert)
- Monitoring & DQA: automated data quality checks, KPI design, dashboards, DQ scoring
- Communication & writing: executive summaries, donor-style reports, slide decks, SOPs
- Tools & practices: Git/GitHub, issue-driven workflows, reproducible notebooks, basic Docker, familiarity with Copilot/AI tools

ACHIEVEMENTS & IMPACTS

- Built a reproducible DQA workflow used to generate regular monitoring reports and dashboards for program managers.
- Turned citizen feedback into prioritized recommendations used to inform local

Web Developer & Digital Marketing Specialist — Samfash Investment & Printing Service

Jan 2024 – May 2024

Designed and launched the company website and implemented SEO and GA4 tracking to measure user behaviour and traffic sources.

Used analytics to recommend content and conversion improvements that increased online visibility.

IT Support & Administrative Assistant — National Power Training Institute of Nigeria (NAPTIN)

May 2022 – Nov 2022

Maintained structured records and performed regular data entry; provided IT support and network troubleshooting to ensure operational continuity.
